SUMMARY

Full Stack Web Developer leveraging a decade of experience in the mental health field to create a more accessible experience on the web. Recently earned a certificate in Full Stack Web Development from University of Minnesota Coding, with newly developed skills in JavaScript, CSS, HTML, Node.js, the MERN stack, and SQL. Known as an eager learner, always looking to pick up new skills to complete or improve a project. Aim for each project is to improve accessibility and intuitive user experience, to allow everyone access to what the web has to offer. Worked on a team of four to develop a MERN app that aims to help people with mental health needs identify and track their mental state on a daily basis and access resources. I'm excited to use these new skills to help build better experiences on the web for everyone.

SKILLS

Node.js, JavaScript, MERN Stack, SQL, CSS, HTML5, GitHub, Git, REST, MVC, Bootstrap, JSON, XML, Responsive Web Design, MySQL, Sequelize, MongoDB, Mongoose, React.js, Gatsby.js, TDD, API's
